ed to optimize the
functionality of DOD applications on
mobile devices while minimizing
replication, cost, and downtime.
Appian was among the first mobile
app providers to be selected for
inclusion in the store.

INDUSTRIES

As part of the overall DISA Digital
Strategy, mobile applications are a
critical component of federal
defense services and will allow for
new opportunities to improve
agency-wide mission effectiveness.
The application store supports
1,800 unclassified mobile devices
to-date in a limited roll out and will
support up to 100,000 users by the
end of fiscal 2014, according to
DISA. Only devices managed by
DOD will have access to the
application store, minimizing
security risk.

Appian applications integrate
[business process management](#)
software, enterprise data
navigation, and native mobility
through a simple collaborative
interface to accelerate decisions,
increase productivity and improve
mission attainment. Through code-
free application composition,
Appian provides the fastest way to
deliver new applications across a

agency processes
of the DOD. All
ns are natively

mobile on all popular platforms with
zero additional development or
maintenance cost.

ONE PLATFORM

INDUSTRIES

With Appian's native mobile apps, users can communicate, take action, send requests, receive notifications, and integrate with existing CRM, ERP, and database systems. Appian's mobile BPM capabilities quickly modernize processes and systems for the latest mobile devices allowing today's worker to make mission critical decisions from anywhere, at any time. [Appian's SAIL](#) (Self-Assembling Interface Layer) technology ensures the best end-user experience on any device by enabling developers to rapidly create and deploy dynamic and engaging user interfaces.

"Helping the DOD modernize processes to accelerate mission attainment is in Appian's DNA," said Chris O'Connell, Vice President of Federal Sales at Appian. "Our participation in DOD MAS provides all branches the ability to take advantage of modern mobile apps that can be deployed across the entire workforce."

Appian is a leading low-code software development platform that enables organizations to rapidly develop powerful and unique applications. The applications created on Appian's platform help companies drive digital transformation and competitive differentiation. For more information, visit www.appian.com.
