

Harness the Low-Code Revolution: Appian Quick Apps

- Transform ideas into innovation
- Stay ahead of shadow IT
- Build business apps with no code
- Expand apps with ease

What if you could turn an idea into a business app in mere minutes?

Introducing Appian Quick Apps. Easy. Powerful. FAST.

Appian Quick Apps empowers anyone in your organization to transform great ideas into functional apps in minutes...*with no technical knowledge or training.*

How easy and fast could it possibly be?

In the time it takes you to read this, you could build a remarkable app.

- 1 Name it.
Pick a name for your app.

Create Quick App

Name

Form

Finished

Welcome to the Quick App creation wizard. Each Quick App helps your users capture and manage information on a single topic, like support tickets or resource requests. That information will be represented by entries within your Quick App.

Let's start by naming your Quick App and the entries each user will create. Don't worry, everything you enter in this wizard can be updated later.

App Name *

Singular Entry Name *

Description

Plural Entry Name *

This will be posted when your Quick App is created, to explain the app to your users

Next, we need to define the form that users will fill out when they create and update entries for Auditors' Request Journal.

Fields

The title, status, and priority fields are required to create an entry. You may add any additional fields using the 'New Field' link below the grid.

Label	Type	Configuration	Required			
Title	Text		<input checked="" type="checkbox"/>	↑	↓	×
Status	Single selection from list	Requested, Planned, In Progress, Under Re	<input checked="" type="checkbox"/>	↑	↓	×
